

**Pubblicazioni su riviste scientifiche (peer reviewed) reperibili nei database PubMed ([www.pubmed.com](http://www.pubmed.com)) della National Library of Medicine (USA), MEDLINE, ISBN (International Standard Book Number).**

**Papers published in peer-reviewed scientific journal listed in [www.pubmed.com](http://www.pubmed.com) and ISBN (International Standard Book Number). Papers published as book chapters.**

Chiarugi, V., Ruggiero, M. and Ricoveri, W.: *Rapid and simple method for the detection of nanogram amounts of arachidonate metabolites resolved by thin-layer chromatography.*  
J. Chromatogr. 280: 400-403, 1983.

Chiarugi, V. P., Fibbi, G., Del Rosso, M., Ruggiero, M., Pasquali, F., Viti, M. and Vannucchi, S.: *Cooperative effect of exogenous heparin-like compounds and secreted glucocorticoid-induced inhibitor on plasminogen-activator in 3T3-cell cultures.*  
Tumori 70: 301-306, 1984.

Ruggiero, M., Fedi, S., Bianchini, P., Vannucchi, S. and Chiarugi, V.: *Molecular events involved in the proaggregating effect of heparin on human platelets.*  
Biochim. Biophys. Acta 802: 372-377, 1984.

Chiarugi, V. and Ruggiero, M.: *Cooperative effect of cortisone and heparin in the control of plasminogen activator.*  
It. J. Biochem. 33: 141-142, 1984.

Chiarugi, V. and Ruggiero, M.: *Transmembrane coupling of signals in inflammation and cancer.*  
Bull. Mol. Biol. Med. 9: 63-110, 1984.

Ruggiero, M., Fibbi, G., Del Rosso, M., Vannucchi, S., Pasquali, F., and Chiarugi, V.: *Cell-type-independent accumulation of phosphatidic acid induced by trifluoperazine in stimulated human platelets, leukocytes and fibroblasts.*  
In: Aaronson, S. A., Frati, L. and Verna, R. (Eds.): "Genetic and Phenotypic Markers of Tumours".  
New York and London, Plenum Press, 1984, pp. 75-80.

Ziche, M., Ruggiero, M., Pasquali, F. and Chiarugi, V. P.: *Effects of cortisone with and without heparin on angiogenesis induced by prostaglandin-E1 and by S180 cells, and on growth of murine transplantable tumors.*  
Int. J. Cancer 35: 549-552, 1985.

Vannucchi, S., Ruggiero, M. and Chiarugi, V.: *Complexing of heparin with phosphatidylcholine. A possible supramolecular assembly of plasma heparin.*  
Biochem. J. 227: 57-65, 1985.

Lapetina, E. G., Silio, J. and Ruggiero, M.: *Thrombin induces serotonin secretion and aggregation independently of inositol phospholipid hydrolysis and protein phosphorylation in human platelets permeabilized with saponin.*  
J. Biol. Chem. 260: 7078-7083, 1985.

Ruggiero, M., Zimmerman, T. P. and Lapetina, E. G.: *ATP depletion in human platelets caused by permeabilization with saponin does not prevent serotonin secretion induced by collagen.*  
Biochem. Biophys. Res. Comm. 131: 620-627, 1985.

Ruggiero, M. and Lapetina, E. G.: *Leupeptin selectively inhibits human platelet activation by thrombin and trypsin: a role for a proteolytic-mediated pathway in transmembrane signalling.* Biochem. Biophys. Res. Comm. 131: 1198-1205, 1985.

Ruggiero, M. and Lapetina, E. G.: *Protease and cyclooxygenase inhibitors synergistically prevent activation of human platelets.* Proc. Natl. Acad. Sci. USA 83: 3456-3459, 1986.

Ruggiero, M. and Lapetina, E. G.: *Sustained proteolysis is required for human platelet activation by thrombin.* Thromb. Res. 42: 247-255, 1986.

Chiarugi, V., Ruggiero, M., Porciatti, F., Vannucchi, S. and Ziche, M.: *Cooperation of heparin with other angiogenetic effectors.* Int. J. Tissue Reaction 8: 129-133, 1986.

Watson, S. P., Ruggiero, M., Abrahams, S. and Lapetina, E. G.: *Inositol 1,4,5-trisphosphate induces aggregation and release of 5-hydroxytryptamine from saponin permeabilized human platelets.* J. Biol. Chem. 261: 5368-5372, 1986.

Ruggiero, M. and Lapetina, E. G.: *Thrombin and trypsin activate phospholipase C in human platelets via a proteolytic-mediated pathway.* Sem. Thromb. Haem. 12: 241-243, 1986.

Vannucchi, S., Pasquali, F., Chiarugi, V. and Ruggiero, M.: *Internalization and metabolism of endogenous heparin by cultured endothelial cells.* Biochem. Biophys. Res. Comm. 140: 294-301, 1986.

Chiarugi, V. P., Pasquali, F., Vannucchi, S. and Ruggiero, M.: *Point-mutated p21ras couples a muscarinic receptor to calcium channels and polyphosphoinositide hydrolysis.* Biochem. Biophys. Res. Comm. 141: 591-599, 1986.

Ruggiero, M. and Lapetina, E. G.: *Antipain or leupeptin in combination with aspirin or indomethacin synergistically inhibit human platelet activation by thrombin and trypsin.* In: Samuelsson, B., Paoletti, R. and Ramwell, P. W. (Eds.): "Advances in Prostaglandin, Thromboxane, and Leukotriene Research". New York, Raven Press, vol. 17, pp. 563-568, 1987.

Ruggiero, M., Corradetti, R., Chiarugi, V. and Pepeu, G.: *Phospholipase C activation induced by noradrenaline in rat hippocampal slices is potentiated by GABA-receptor stimulation.* EMBO J. 6: 1595-1598, 1987.

Corradetti, R., Ruggiero, M., Chiarugi, V. and Pepeu, G.: *GABA-receptor stimulation enhances norepinephrine-induced polyphosphoinositide metabolism in rat hippocampal slices.* Brain Res. 411: 169-199, 1987.

Laffi, G., Cominelli, F., Ruggiero, M., Fedi, S., Chiarugi, V. P., and Gentilini, P.: *Molecular mechanism underlying impaired platelet responsiveness in liver cirrhosis.* FEBS Lett. 220: 217-219, 1987.

Chiarugi, V. P., Ruggiero, M., and Porciatti, F.: *Oncogenes and transmembrane cell signaling*.  
Cancer Invest. 5: 215-230, 1987.

Chiarugi, V. P., Porciatti, F., Pasquali, F., Magnelli, L., Giannelli, S., and Ruggiero, M.:  
*Polyphosphoinositide metabolism is rapidly stimulated by activation of a temperature-sensitive mutant of Rous sarcoma virus in rat fibroblasts*.  
Oncogene 2: 37-40, 1987.

Ruggiero, M., Giannelli, S., and Ruggiero, C.: *Effetti della prostaciclina sulle piastrine umane: meccanismo d'azione molecolare*.

Medicina 7: 427-429, 1987 (Questo lavoro vince il Premio Medicina per giovani ricercatori. Winner of the prize "Premio Medicina" for young researchers).

Pierce, J. H., Ruggiero, M., Fleming, T. P., Di Fiore, P. P., Greenberger, J. S., Varticovski, L., Schlessinger, J., Rovera, G., and Aaronson, S. A.: *Signal transduction through the EGF receptor transfected into IL-3-dependent hematopoietic cells*.  
Science 239: 628-631, 1988.

Pellegrini-Giampietro, D. E., Ruggiero, M., Giannelli, S., Chiarugi, V. P., and Moroni, F.: *Morphine withdrawal "in vitro": potentiation of agonist-dependent polyphosphoinositide breakdown*.

Eur. J. Pharmacol. 149: 297-306, 1988.

Berti, A., Stefani, M., Degl'Innocenti, D., Ruggiero, M., Chiarugi, V., and Ramponi G.: *Effect of exogenously added acylphosphatases on inositol lipid metabolism in human platelets*.

FEBS Lett. 235: 223-232, 1988.

Laffi, G., Cominelli, F., Ruggiero, M., Fedi, S., Chiarugi, V. P., La Villa, G., Pinzani, M., and Gentilini, P.: *Altered platelet function in cirrhosis of the liver: impairment of inositol lipid and arachidonic acid metabolism in response to agonists*.

Hepatology 8: 1620-1626, 1988.

Ruggiero, M., and Ruggiero, C.: *Trasduzione del segnale mitogeno indotto dal prodotto del proto-oncogene c-sis*.

Medicina 8: 429-431, 1988.

Chiarugi, V.P., Ruggiero M. and Corradetti R.: *Oncogenes, protein kinase C, neuronal differentiation and memory*.

Neurochem. Intl. 14: 1-9, 1989.

Pugliese, A. M., Giannelli, S., Corradetti, R., and Ruggiero, M.: *GABA-receptor agonists and noradrenaline: effects on inositol lipid metabolism in the hippocampus*.

Nihon Univ. J. Med. 31: 143-148, 1989.

Casamassima, F., Ruggiero, C., Caramella, D., Tinacci, E., Villari, N., and Ruggiero, M.: *Hematopoietic bone marrow recovery after radiation therapy: MRI evaluation*.

Blood 73: 1677-1681, 1989.

Selezionato in "Mosby Year Book of Hematology", J.L. Spivak Ed., Chicago. Chapter 3- Hematologic Malignancies / 115, 3-10.

Ruggiero, M., Srivastava, S.K., Fleming, T.P., Ron, D., and Eva, A.: *NIH/3T3 fibroblasts transformed by the dbl oncogene show altered expression of bradykinin receptors. Effect on inositol lipid turnover.*

Oncogene 4: 767-771, 1989.

Ramponi, G., Manao, G., Camici, G., Cappugi, G., Ruggiero, M., and Bottaro, D.P.: *The 18 kDa cytosolic acid phosphatase from bovine liver has phosphotyrosine phosphatase activity on the autophosphorylated epidermal growth factor receptor.*

FEBS Lett. 250: 469-473, 1989.

Chiarugi, V.P., Magnelli, L., Pasquali, F., Basi, G. and Ruggiero, M.: *Signal transduction in EJ-H-ras-transformed cells: de novo synthesis of diacylglycerol and subversion of agonist-stimulated inositol lipid metabolism.*

FEBS Lett. 252: 129-134, 1989.

Matsui, T., Pierce, J.H., Fleming, T.P., Greenberger, J.S., LaRochelle, W.J., Ruggiero, M. and Aaronson, S.A.: *Independent expression of human alpha or beta PDGF receptor cDNAs in a naive hematopoietic cell leads to functional coupling with mitogenic and chemotactic signaling pathways.*

Proc. Natl. Acad. Sci. USA 86: 8314-8318, 1989.

Chiarugi, V., Bruni, P., Pasquali, F., Magnelli, L., Basi, G., Ruggiero, M. and Farnararo, M.: *Synthesis of diacylglycerol de novo is responsible for permanent activation and down-regulation of protein kinase C in transformed cells.*

Biochem. Biophys. Res. Comm. 164: 816-823, 1989.

Ruggiero, M., Fleming, T.P., Matsui, T., di Marco, E., Molloy, C., di Fiore, P.P., and Pierce, J.H.: *EGF triggers a similar signalling cascade in different cell types overexpressing the EGF receptor.*

In: J.H. Vanderhoek (Ed.): "Biology of cellular transducing signals". Plenum Press Publisher, New York, pp. 39-47, 1990.

Vannucchi, S., Pasquali, F., Fiorelli, G., Bianchini, P. and Ruggiero, M.: *Effect of heparin on proliferation and signalling in BC3H-1 muscle cells. Evidence for specific binding sites.*

FEBS Lett 263:137-141, 1990.

Nassi, P., Nediani, C., Liguri, G., Taddei, N., Ruggiero, M. and Ramponi, G.: *Effect of acylphosphatase on human erythrocyte membrane  $Ca^{2+}$ -ATPase.*

Biochem. Biophys. Res. Comm. 168: 651-658, 1990.

Vannucchi, S., Pasquali, F., Chiarugi, V.P. and Ruggiero, M.: *Inhibition of BC3H-1 cell growth by heparin is related to decreased mitogenic signalling.*

Biochem. Biophys. Res. Comm. 170: 89-95, 1990.

Pierce, J.H., Di Marco, E., Cox, G., Lombardi, D., Di Fiore, P.P., Ruggiero, M., Varesio, L., Sakaguchi, A.Y. and Aaronson, S.A.: *CSF-1 induces proliferation, chemotaxis and reversible monocytic differentiation in myeloid progenitor cells transfected with the human c-fms/CSF-1 receptor cDNA.*

Proc. Natl. Acad. Sci. USA 87: 5613-5617, 1990.

Pasquali, F., Oldani, C., Ruggiero, M., Magnelli, L., Chiarugi, V. and Vannucchi, S.: *Interaction between endogenous circulating sulfated glycosaminoglycans and plasma proteins.*

Clin. Chim. Acta 192: 19-28, 1990.

Chiarugi, V., Magnelli, L., Pasquali, F., Vannucchi, S., Bruni, P., Quattrone, A., Basi, G., Capaccioli, S. and Ruggiero, M.: *Transformation by ras oncogene induces nuclear shift of protein kinase C.*

Biochem. Biophys. Res. Comm. 173: 528-533, 1990.

Chiarugi, V.P., Basi, G., Quattrone, A., Micheletti, R. and Ruggiero, M.: *The old and the new in transformed cell signalling: glycolysis, diacylglycerol and protein kinase C.*

Second Mess. and Phosphoproteins 13: 69-85, 1990.

Soldati, L., Molinari, I., Salardi, S., Barber, B.R., Ruggiero, M., Serra, F. and Bianchi, G.: *Calpastatin level in spontaneously hypertensive rats.*

Biochem. Biophys. Res. Comm. 175: 486-491, 1991.

Heidaran, M.A., Pierce, J.H., Lombardi, D., Ruggiero, M., Gutkind, J.S., Matsui, T. and Aaronson, S.A.: *Deletion or substitution within the alpha-Platelet Derived Growth Factor receptor kinase insert domain: effects on functional coupling with intracellular signaling pathways.*

Mol. Cell. Biol. 11: 134-142, 1991.

Orlandini, G.E., Ruggiero, C., Gulisano, M., Ruggiero, M., Villari, N., Casamassima, F.: *Magnetic resonance (MR) evaluation of bone marrow in vertebral bodies.*

Ital. J. Anat. Embriol. 96: 93-100, 1991.

Chiarugi, V.P., Ruggiero, M., Magnelli, L., Pacini, S., Pasquali, F. and Chiarugi, P.: *Phosphorylative signal transduction from the cell membrane to the nucleus.*

Bull. Mol. Biol. Med. 16: 149-160, 1991.

Vannucchi, S., Pasquali, F., Chiarugi, V.P. and Ruggiero, M.: *Heparin inhibits A431 cell growth independently of serum and EGF mitogenic signalling*

FEBS Lett. 281: 141-144, 1991.

Yu, J.C., Heidaran, M.A., Pierce, J.H., Gutkind, S., Lombardi, D., Ruggiero, M. and Aaronson, S.A.: *Tyrosine mutations within the alpha Platelet-Derived Growth Factor receptor kinase insert domain abrogate receptor-associated phosphatidylinositol-3 kinase activity without affecting mitogenic or chemotactic signal transduction.*

Mol. Cell. Biol. 11: 3780-3785, 1991.

Ruggiero, M., Wang, M.L. and Pierce, J.H.: *Mitogenic signal transduction in normal and transformed 32D hematopoietic cells.*

FEBS Lett. 291: 203-207, 1991.

Ruggiero, M., Casamassima, F., Magnelli, L., Pacini, S., Pierce, J.H., Greenberger, J.S. and Chiarugi, V.P.: *Mitogenic signal transduction: a common target for oncogenes that induce resistance to ionizing radiations.*

Biochem. Biophys. Res. Comm. 183: 652-658, 1992.

Ramponi, G., Ruggiero, M., Raugei, G., Berti, A., Modesti, A., Degl'Innocenti, D., Magnelli, L., Pazzagli, C., Chiarugi, V.P. and Camici, G.: *Overexpression of a synthetic phosphotyrosine protein phosphatase gene inhibits normal and transformed cell growth.*

Int. J. Cancer 51: 652-656, 1992.

Del Rosso, M., Anichini, E., Pedersen, N., Blasi, F., Fibbi, G., Pucci, M. and Ruggiero, M.: *Urokinase-urokinase receptor interaction: non-mitogenic signal transduction in human epidermal cells.*

Biochem. Biophys. Res. Comm. 190: 347-352, 1993.

Vincenzini, M.T., Marraccini, P., Iantomasi, T., Favilli, F., Pacini, S. and Ruggiero, M.: *Altered metabolism of glutathione in cells transformed by oncogenes which cause resistance to ionizing radiations.*

FEBS Lett. 320: 219-223, 1993.

Ruggiero, M.: *Membrane receptors and signal transduction in tumour cells.*

In: Ohnishi, S.T. and Ohnishi, T. (Eds.): "Cellular Membrane: a key to Disease Processes", pp. 141-177, CRC Press, Boca Raton, FL, USA, 1993.

Ruggiero, M., Pazzagli, C., Rigacci, S., Magnelli, L., Raugei, G., Berti, A., Chiarugi, V.P., Pierce, J.H., Camici, G. and Ramponi, G.: *Negative growth control by a novel low Mr phosphotyrosine protein phosphatase in normal and transformed cells.*

FEBS Lett. 326: 294-298, 1993.
